

I would like to express my concerns on low power FM. My family listens to the K-Love network on a local radio station. There is the possibility that your plans for LPFM could cause us to lose this station. We believe this station as is supplies our community with an alternative form of music that we find inspiring and benifcial to our family. Our community would be losing a station that helps to encourage our young and helps to strentghen our values through music. Please protect these stations from being eliminated due to any rule changes. Thank You, David Soard
